

## ANESTHETIC CONSENT FORM FOR

Treatment/Surgical Procedure:

All pets admitted must be current on their vaccinations for Rabies, DHPP, Bordetella for dogs and Rabies, FVRCP for cats. In addition, both must be currently on heartworm prevention or have a current intestinal parasite check. If your pet is past due, they will be given the necessary vaccinations or test upon admission and current charges will apply. They must be free of fleas and ticks. All pets found to have evidence of fleas will be given a capstar (flea pill) upon arrival and will be charged accordingly.

We strive to provide you with the advice that will allow you to make the best decision for your pet. In order to offer you the peace of mind you deserve, we recommend a pre-anesthetic blood profile prior to any anesthetic procedure. The latest technology enables us to perform these tests in the hospital just prior to anesthesia.

For all pets, young and old, it gives baseline data that can later be used for a more accurate diagnosis and treatment when a problem does arise. It can also detect disease in pets without visible symptoms; with many diseases, symptoms are only realized late in the disease when significant damage has already been done. In other words, an animal that looks and acts healthy is not necessarily disease-free. For those older pets, it can monitor organ degeneration and response to medication. These tests include **blood chemistry** profiles to evaluate your pet's vital organs, as well as **hematology** tests checking the blood cells themselves. These are similar to tests your own physician would perform prior to your undergoing anesthesia.

Although performing these tests cannot guarantee the absence of complications, it can significantly minimize the risk to your pet and provide you and us with peace of mind.

### The total cost for these tests is \$ 68

- Yes, I want my pet to have the recommended tests.  
 No, I do not want my pet to have the recommended tests.

We also offer dental cleaning and microchipping at an **additional cost**.

Dental       yes     no    **\$92 plus additional cost for extractions if needed**  
Microchip     yes     no    **\$50**

Answer only if your pet is here to be spayed. Do you want the doctor to continue with surgery if your pet is in **heat or pregnant?** There will be **additional charges** if so. There are also **additional health risks** involved.

- Yes, I want the doctor to continue with surgery.  
 No, I do not want the doctor to continue with surgery.

**IF THERE IS EXCESSIVE INTRA-ABDOMINAL FAT THERE WILL BE AN ADDITIONAL CHARGE OF \$25 TO \$100 BASED ON THEIR WEIGHT.**

### ANESTHESIA AND SURGERY/TREATMENT RELEASE

I authorize the veterinarian and staff at Nolan River Animal Hospital to perform such diagnostic, therapeutic, anesthetic, dental and/or surgical procedures that have been described to me. I understand that no guarantee can be made regarding results or cure.
